

The biggest drawback for Christmas is the pine needles, nothing brings on the holiday blues more than the thought of hoovering up pine needles well into early spring. That's why Flare Developers have been researching all year to bring you the Flare patented Needle-free Christmas Tree.. With sustainable development being at the forefront of all our minds, you'll be pleased to know that our Flare Christmas Tree will save trees. Our developers estimate that it will take nearly 7000 of our trees to equal one single traditional 5ft Christmas Tree! Have a sustainable and needle free Christmas from Flare Solutions.
